About us

At Fletchers, we really understand the dynamics of what it takes to become and remain a successful company. And because we're business people first and foremost, we know that your business needs good irrigation and a constant stream of fresh ideas in order to grow and flourish.

When business owners think about accountants, they tend to come up with terms such as reliability, honesty and promptness. Of course these are all essential qualities that any accountant worth his salt needs to possess. But they're hardly going to give you the edge you need to excel in today's fast paced and unforgiving business environment.

So if you're looking for intelligent vision, proactive support and focused strategies designed to drive your business, build your wealth and protect your assets, then you're probably looking for someone like us.

Working in partnership with Fletchers is refreshingly different. Imagine a committed partnership driven by a mutual desire to take your business from strength to strength and you'll be pretty close.

Would your business benefit from...

- Fixed competitive fees
- Tax planning – intelligent & strategic support designed to optimise your wealth
- Value added work – including management information systems & strategic planning
- A response to your queries within 24 hours
- Your own personal account manager from Day 1
- Goal focused support to stimulate positive change from within
- Proactive guidance and tried and tested formulas designed to increase your personal and business wealth

Then let's talk.

Please call us if you would like to explore how we can help. We're always happy to provide a FREE consultation or fixed price quote.

Services

At Fletchers, we realise change isn't for everyone. Some business owners simply want to stick with what they know and that is fine by us. If, however, you're looking for a proactive partner who possesses real business acumen and a strong desire to support your growth and success, we think you'll be pleasantly surprised by our approach.

Of course, we're exceptionally good at looking after your day-to-day accounting needs too. But when you need more, you'll find that our commercially intelligent team of experts really come into their own.

Whether you're a new business start-up, a growing concern, a firmly established organisation or an individual looking to optimise and protect your assets, we can tailor our services to meet your goals head on. And whenever you need us, you can always rely on fixed price, up-front quotes, so you'll always know exactly where you stand.
